

ASCII codes for adding diacritics to EndNote records
when the letters don't import correctly:

For PCs, hold down the ALT key and then use the number pad to type the numbers.

For Macs, first hold down the Option key plus the designated key(s) (e.g., Op+e). If the chart below does not connect the keys with a "+", release and then type the letter indicated. For capitalization, use the shift key and the letter.
