Using your UCSB NetID to log-in to ArcGIS Pro

ArcGIS Pro requires authentication with an authorized ArcGIS Online account. Before attempting to use ArcGIS Pro, you need to first log-in to ArcGIS Online (AGO) with your UCSB NetID here—this will automatically create an AGO account for you. Next, send an email to collaboratory@library.ucsb.edu and request that your userID be provisioned for ArcGIS Pro.

Now you can sign on:

1. Choose ‘Sign in with enterprise account.’

2. Enter “ucsb” into the subdomain box.
3. Choose “Using Your UC Santa Barbara Account”

4. Enter your UCSBnetID credentials into the familiar Identity passport box.
